

PRESSRELEASE 2003-10-06

**Electrohype is launching an open on-line forum for new media art in Sweden.**

The Malmö based organization is now launching the first open on-line forum for new media art in Sweden. The forum is organized as mailing list called [openlist@electrohype.net].

The main language of the list will be Swedish and Scandinavian but postings in English are also accepted.

The reason for creating Openlist is the large number of requests Electrohype have received, regarding the need for a Swedish forum for new media art. These requests are from both artists and organizations, both Swedish and foreign.

Openlist has the same practical functionalities as other foreign lists in the field of new media art. Openlist follows the tradition of lists like "Syndikat", "SPECTRE" and E-Kunst.

Openlist has its own website where you can subscribe to the list, get practical info and read the list archive.

You find the list at: [www.electrohype.net/openlist](http://www.electrohype.net/openlist)

The list will be not be moderated but we will encourage the subscribers to follow certain guidelines.

Electrohype provides the list as a free service "as it is" . We will point out the fact that the list might distribute content that does not necessary correspond with the organization Electrohype. Each "author" is responsible for the content of their own articles.

We hope the list will grow and evolve into a useful tool for those who are interested in new media art.

ENJOY

Best

Anna Kindvall and Lars Midbøe at Electrohype
